EvolvePK+
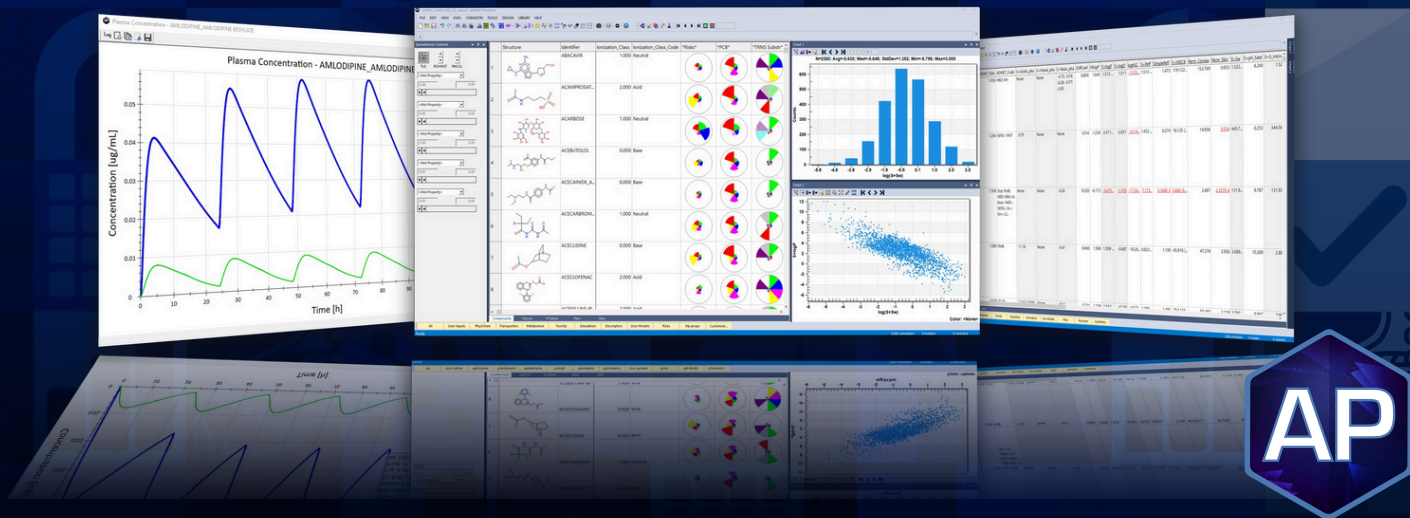

Only one platform can integrate GastroPlus® PBPK outcomes during early design and lead optimization.

AP

Features + Functionality	Competitors	EvolvePK+
Synthesis feasibility predictions integrated into the multi-parameter optimization (MPO) process	✓	✓
Customizable MPO ranking functions including drug-like and PBPK endpoints	✗	✓
Rapid *de novo* compound generation within a commercially supported & maintained software environment	✗	✓
Leverages independently validated/qualified models into the MPO process	✗	✓
Mechanistic PBPK endpoints, including target tissue selectivity, utilizing the GastroPlus ACAT™ model	✗	✓
Easily integrates endpoints from custom ML models or 3rd-party software	✗	✓
>10M molecules/day w/PBPK scores on standard laptop	✗	✓
